*****NOTICE*****

Attention Landowner:

2022 Emergency Water Application

The Lindsay-Strathmore Irrigation District has been working to secure a supplemental source of surface water supply for the 2022-2023 water year. This action is based on the anticipation that the historic water shortage conditions we are currently witnessing in Northern California will continue and may not be adequate to meet the irrigation demand within the district.

There is an immediate opportunity to secure an emergency supply for delivery to the district.

The District will continue working to secure additional supplies from State, Federal and local sources. This current source of supplemental supply, when and if they can be secured, will currently require a deposit of \$2,083/acre-foot. This water must be used in the District and cannot be carried over to next year.

If supplemental water is desired, please indicate below the total desired amount (in acre feet) for 2022-2023 and return with the correct deposit **AS SOON AS POSSIBLE**. If the final cost of all supplemental supplies is more than \$2,083/acre-foot, you will be billed for the additional amount and payment must be received prior to delivery of water.

Should you have any questions regarding this application, please do not hesitate to contact the District office at 559-562-2581. Please call the District prior to submitting payment as the quantity of this water is limited to approximately 2,000AF for the entire District and will be sold on a first come first served basis.

Craig N. Wallace
General Manager

<u>Description</u>	<u>Cost</u>	Supplemental Supply	Calculated Total Cost
2022 EMERGENCY WATER	\$2,083 Per acre-foot	Requested	
EMERGENCY WATER PURCHASE	\$2,083 / aft	aft	\$
